**Our strength lies in the details.
Our high standards ensure your building will stand the test of time.**

- In ground columns or sits on concrete
- Clear spans up to 120 feet
- Machine stress rated (MSR) lumber is used where needed
- Build to withstand 105 mph winds
- No height restrictions
- Building code compliance and design adaptability
- Energy efficient

Whether it is a shop, a storage facility or anything in between, we've got the building for you. Our professional sales staff will work with you every step of the way to ensure we design and build the building that you want and need.

Our custom buildings are engineered and designed to meet codes wherever you live, so you know you are getting exactly what you need.
